○ Members must confirm that they would like to receive insurance cover, that is opt in, after considering their personal situation and needs and the cost of cover.

○ Members can cancel, reduce or opt out of cover at any time.

○ Voluntary death, TPD and income protection covers are also available to super accumulation members of MAP Super.

Please refer to the MAP Super Insurance Guide for more details.
Consistency between target market and the product

MAP Super Accumulation account is likely to be consistent with the likely objectives, financial situation and needs of the class of members in the target market because:

- it is a retirement savings product,
- the member is contributing to their retirement balance,
- the member is investing directly in the product,
- the member can only invest in pre-mixed pooled investment options,
- the member is within the targeted age band and can invest with any amount, and
- the insurance requirements for members of this demographic are considered high (with younger age groups who are more likely to be funding ‘raising a family’ expenses and mortgages and a meaningful proportion of members working full-time).

Distribution channels

MAP Super Accumulation account has been designed to be distributed through the following means:

- Through employer contributions in the product on behalf of the member, and
- Available for investment directly online by members through https://onesuper.com/funds/map-super/

Distribution conditions

MAP Super Accumulation account should only be distributed under the following circumstances:

- If the members meet the eligibility criteria for their selection of insurance,
- If the member is aged between 15 to 75 years at the time of opening their MAP Super Accumulation account, or
- If the member has created an online account with MAP Super.

Adequacy of distribution conditions and restrictions

- Members investing in the product will be asked a number of questions in the application form to sign up to the product. These questions seek to ensure that the distribution conditions are met, therefore making it likely that members who invest in the product are in the class of members for which it has been designed for.
- The member should not be expecting a default investment option with the product having choice pooled investment options.

This is based on an assessment of the distribution conditions and restrictions and that they are appropriate and will assist distribution in being directed towards the target market for whom the product has been designed.
